📞 +971 50 519 2677 ✉️ vyas.hitarth@outlook.com [in](#) [Hitarth Vyas](#)¹ [G](#) [Hithaard47](#)²

Introduction

ICT graduate specializing in AI-powered tools and backend systems. Built and deployed an AI security auditing platform using Python, FastAPI, and Google Gemini that analyzes Android app permissions against privacy policies. Experience delivering end-to-end software solutions and integrating LLMs into practical applications.

Education

Dhirubhai Ambani University (formerly DA-IICT), Gandhinagar

July 2020 – July 2024

Bachelors in Information and Communication Technology

Coursework: DBMS, Data Structures & Algorithms, Operating Systems, Software Engineering

Technical Skills

Languages: Python, JavaScript (ES6+), C++, SQL, Lua
Backend & APIs: FastAPI, REST APIs, Django
AI & Automation: Google Gemini API, BeautifulSoup4
Databases: SQL, MongoDB
Web: HTML5, CSS3, Next.js, Tailwind CSS, Wordpress
Tools: Git, VS Code

Work Experience

Software Developer (Contract) [Website Link](#)³

October 2025 – May 2026

Poole Process Engineering Services

Remote

- Built and launched the company's first website end-to-end (frontend + backend) from zero online presence
- Owned the full lifecycle from requirements gathering through deployment and iteration with stakeholders
- Optimized website performance and SEO
- Built and maintained production systems using JavaScript, CSS, and modern web tooling

IT Support Intern — IT Operations & Data Management

January 2024 – Jul 2024

Sophos Technologies Pvt. Ltd.

Ahmedabad, India

- Maintained enterprise asset and user databases while ensuring data accuracy and consistency
- Performed user onboarding, access provisioning, and record management
- Tracked and documented incidents through enterprise ticketing systems
- Supported asset lifecycle management and data reconciliation across enterprise systems

Cyber Security Intern

May 2023 – Jun 2023

Tech Mahindra Ltd.

Pune, India

- Developed a Python tool to automate SSL certificate validation
- Studied cybersecurity fundamentals including firewalls and threat intelligence domains and red/blue team practices

IT Intern

Jul 2021 – Aug 2021

Al Nasser Industrial Enterprises

Abu Dhabi, UAE

- Assisted IT team with internal system support
- Observed enterprise IT workflows and software usage

Projects

Permission to Defend | Python, FastAPI, Google Gemini [Vercel Live Demo](#)⁴

- Built an AI-powered privacy auditing tool that detects mismatches between Android app permissions and privacy policies.
- Created automated pipelines to extract permissions from Google Play Store pages and AndroidManifest.xml files.
- Integrated Gemini 2.5 Flash via REST APIs to perform semantic analysis and generate a risk dashboard + domain-guarded chatbot.

Projects (Cont'd)

TrackEat! | *Flutter, Dart, Hive*

- Built a cross-platform mobile app using Flutter & Dart for meal tracking and real-time order calculation.
- Implemented an offline-first Hive NoSQL database for instant local caching and sub-millisecond CRUD operations.
- Designed dynamic, responsive UI flows with reactive state management to maintain consistent 60 FPS performance.
- Structured robust data models and input validation to eliminate runtime null-pointer exceptions.

Crime and Hazard Tracker | *Bootstrap, Django, MongoDB* [YouTube](#)⁵

- Developed a data-driven application to collect, store, and visualize crime and hazard data.
- Designed backend data models and integrated APIs to process structured information.
- Collaborated with teammates to test, debug and optimize application performance.

Logistics Optimization using Dijkstra's Algorithm | *C++* [YouTube](#)⁶

- Implemented Dijkstra's algorithm to optimize multi-node logistics routes.
- Designed and validated solutions for real-world routing scenarios.

Need for 50: Race Against Time | *Unity, C#* [YouTube](#)⁷

- Developed a small racing game prototype with player controls and timers
- Implemented gameplay logic and interaction systems
- Optimized game assets for improved performance

Additional Information

Courses:

CS50's Introduction to Game Development - HarvardX

Instructor: Colton Ogden - Harvard Extension School

- LÖVE2D, Lua, Unity 2D and 3D
- State-machines, Sprite Management

Certificate: Harvard CS50's Introduction to Game Development [Link](#)⁸

Languages:

- **Full Proficiency:** English, Hindi, Gujarati, Urdu
- **Elementary Proficiency:** Arabic, German
